Premin[®] EX

Organic microelements are proven for their better bioavailability when compared to inorganic ones. Organic minerals have positive effect on overall health status, immune system, skeletal and muscle growth, tissues, reproduction and production parameters.

ADVANTAGES:

- improves reproduction parameters
- stimulates secretion of genotropic hormones
- lowers appearance of anestrus, 'silent' oestrus and ovarian cyst syndromes
- lowers metritis, mastitis and somatic cell counts
- improves hoof strength
- prevents from infective finger skin diseases (DD and DI)
- lowers scouring and respiration problems
- lowers abortions and deliveries of dead calves
- increases daily gains of calves

PACKAGE:

Multilayer bags 25kg, big bags 700-1000 kg
Store on wooden pallets in dry place.

DOSAGE:

150-300g per head per day

Mineral-vitamin feeds with organic minerals
