APPLICATION INDICATIONS:

- poor reproduction parameters and health problems
- negative energy balance during transition period and the first third of lactation
- poor economics of milk production
- need of 'all in one use' – a combination of rumen and bypass energy and proteins in one product

Nutritional parameters	Unit	
Dry matter	g	915,7
Crude protein	g	203,9
Fibre	g	57,2
Fat	g	220,0
Ash	g	35,3
NEL	MJ	9,26

COMPOSITION:

Amino Plus®, barley malt sprouts, dry spent grains, palmitic acid, dextrose, yeast

DOSAGE:

1 – 2 kg per head per day
